Projects

Gym Management System:
- Create the structure and design of the application. Ensure responsiveness and cross-browser compatibility using HTML,Tailwind CSS and React.
- Write Java servlets to handle HTTP requests, process data, and interact with the database.
- Implement data access objects (DAOs) to manage database interactions and ensure data integrity.
- Implement responsive design to ensure the system is accessible on various devices (desktops, tablets, smartphones).

School Management System:
- A Student Management System simplifies student enrollment, profile management, and scheduling while tracking assignments, grades, and attendance.
- Designed and implemented the UI using HTML, Tailwind CSS, React for profiles, syllabus models, and scheduling features.
- Developed Python server-side logic for managing data storage, retrieval, and processing of assignments and profiles.
- Structured and maintained the database for student, faculty, assignments, and syllabus data.

Co-curricular Activities

- Participated in the "AWS Skill Builder" certification course by AWS.
- Actively participated in networking events and workshops to gain practical insights, leading to Network Security Certification.
- Attended an ACCENTURE VIRTUAL INTERNSHIP conducted by Accenture.
- Participated in the "Artificial intelligence" certification course by APSSDC.
